DATA SHUFFLER

digivey

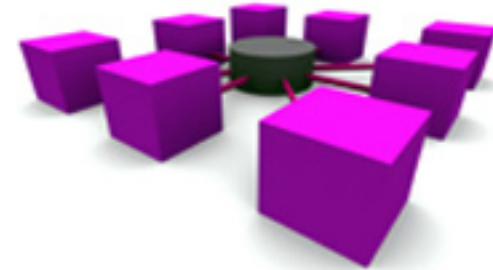

■ *Fast and Easy Project Upload Automation*

Digivey Data Shuffler adds a new dimension to Digivey project upload and data download. No matter how close or how far away your survey stations are, with Digivey Data Shuffler you can remotely control project deployment and data transfer. The automatic project and data handling capabilities of Data Shuffler are convenient and secure. Data Shuffler can be set-up to integrate with your environment.

Data Shuffler gives you the connectivity you need and eases the communication with survey stations. There are no limitations. Whether you need to publish to one survey station or to hundreds of survey stations. Just feed Data Shuffler with the relevant connectivity parameters, define periodic data transfer schedules and you are ready to go.

- *Data Download Automation*
- *Across Networks / Via Internet*
- *Remote Control Over Projects and Data*

Digivey Data Shuffler seamlessly integrates with the Digivey Survey Suite and brings the collected data to your work space. There you can view the data, export the raw data or instantly print comprehensive top-line reports directly with Digivey Analyzer.

Project and data transport with Data Shuffler is convenient, easy and secure. Speak to the Digivey Sales Team about options for implementation.
